今天CCTV5 高清的画面很差？ [复制链接]

发表于 2014-6-13 03:01:20 | 只看该作者 | 倒序浏览

楼主 电梯直达

看的betv HD 的cctv5高清，清晰度比前几天差了很多。

难道是因为怕看的人多太卡，换了低分的视频源？

CCTV5

【直播】粤海宽频23 [复制链接]

发表于 2014-10-6 03:57:01 | 只看该作者 | 倒序浏览

楼主 电梯直达

粤海宽频23所有的回放都有问题，一个小时的回放打开只有半个小时，已经两三天了都是这样。

## Domain Report - ClubTvPad.com

---

Domain Name **ClubTvPad.com**

Prepared On **November 23, 2014**

Website Screenshot taken 10/24/2014

## About This Report

This report documents a thorough analysis of the Internet domain name "**ClubTvPad.com**". It draws on the extensive DomainTools dataset and aims to deliver a comprehensive view of the domain's ownership profile, key historical events and technically linked domain names.

All data in this Report is, or was, freely available through standard Internet DNS and query protocols. DomainTools has not altered the data in any way from its original form, except in certain instances to format it for readability in this Report.

Data from DomainTools is presented as-is, and as captured from the original source. We make no representations or warranties of fitness of any kind.

## About DomainTools

DomainTools offers the most comprehensive searchable database of domain name registration and hosting data. Combined with our other data sites such as DailyChanges.com, Screenshots.com and ReverseMX.com, users of DomainTools.com can review millions of historical domain name records from basic Whois, and DNS information, to homepage images and email settings. The Company's comprehensive snapshots of past and present domain name registration, ownership and usage data, in addition to powerful research and monitoring resources, help customers by unlocking everything there is to know about a domain name. DomainTools is a Top 250 site in the Alexa rankings.

Reach us at [memberservices@domaintools.com](mailto:memberservices@domaintools.com) if you have any questions on this report.

## Ownership History

### Whois History for ClubTvPad.com

DomainTools has 18 distinct historical ownership records for ClubTvPad.com. The oldest record dates Apr 18, 2012. Each record is listed on its own page, starting with the most recent record. The date at the start of the section indicates the first time we captured the record. The website screenshot, when available, will be the image captured as close as possible to the record date.

### About Whois History

DomainTools takes periodic snapshots of domain name Whois records and stores them for subsequent analysis. The database contains billions of Whois records across hundreds of millions of domains, dating back in some cases to 2001.

## Hosting History

DomainTools tracks changes to a domain name's IP address, name server and registrar. These events can be useful signals that may indicate more macro events, including: domain name sales, transfers or deletions; taking a site live with new content; or a change in registration or hosting profile.

### Registrar History

Date	Registrar
Apr 2, 2014	<a href="http://GoDaddy.com">GoDaddy.com</a>

### Name Server History

Event Date	Action	New Server	Previous Server
Nov 10, 2012	Transfer	domaincontrol.com	dreamhost.com
Jul 9, 2012	Transfer	dreamhost.com	domaincontrol.com
Apr 18, 2012	New	domaincontrol.com	-

### IP Address History

Event Date	Action	New IP	Previous IP
Nov 14, 2012	New	50.62.64.1	173.236.194.19
Jul 9, 2012	Change	173.236.194.19	68.178.232.100
May 2, 2012	New	68.178.232.100	-

## Screenshot History

DomainTools captures snapshots of website homepages on regular intervals. This content is useful for researchers to understand how a domain was used at various points in time. Due to the relatively high storage costs of screenshot data, the coverage of screenshot histories is in most cases not as thorough as Whois or hosting data, and this is especially true for dates early in a domain's history.

DomainTools has 1 records collected between Oct 24, 2014 and Oct 24, 2014.

Oct 24, 2014

## Connected Domains

### Shared IP Address

DomainTools uses proprietary techniques to discover other domain names that are hosted on the same IP address (web host) as ClubTvPad.com. This is a sample of up to 100 randomly-selected domains from that dataset. Access to this data provides context in cases where knowing associated domain names has value.

The exhaustive list of connected domains by IP address is available in the Reverse IP product at DomainTools.com.

**Jia Jin Huang** Between Tvpad 4and weltv, which one would you recommend

December 1 at 12:54pm · Edited

**Toyz&More4u - Club TVpad** Tvpad4 is too new for us to determine which is better. We haven't got one on hand to to compare. But base on those who has seen it. Old TVpad users would hate it. If you never used TVpad before then it's like any android device.

Are you a Direct TV subscriber? Then you might be aware that they are removing TVB from their line up at the end of the month. Meaning Direct TV subscribers will no longer receive TVB channels with Direct TV. This is the best time to get a TVpad to replace Direct TV. Please message me for Direct TV replacement Sale! I am hooking all Direct TV subscribers up with a new TVpad! Like this post to spread the word!

Like · Comment

Vincent Poy, Michael Lau, William Chi Kong Yip and 3 others like this.

**Toyz&More4u - Club TVpad** Nice! A few people already took advantage of this sale!! Please continue to spread the word.  
November 12, 2012 at 11:58am

**Hong Yee** Will the channels directv offered be on tvpad? All the tvb channels?  
November 12, 2012 at 12:04pm

**Toyz&More4u - Club TVpad** Unfortunately no, it will only be the current channels available on TVpad.  
November 12, 2012 at 12:07pm

**Jackie Wong** tvb is moving to dishnetwork  
November 12, 2012 at 12:50pm

**Toyz&More4u - Club TVpad** Yes that is correct they are going to Dish Network for \$39 a month. I think TVpad would be a wiser choice.  
November 12, 2012 at 1:03pm

**Hong Yee** Stupid. Oh we'll tvpad rules all anyways.  
November 12, 2012 at 1:24pm

**Toyz&More4u - Club TVpad** Hong Yee, you calling me Stupid? LOL j/k  
November 12, 2012 at 2:31pm

**Desmond Chung** Does this mean no more tvb for tvpad  
November 12, 2012 at 7:41pm

**Toyz&More4u - Club TVpad** NO! It means no more TVB for Direct TV!  
November 12, 2012 at 8:44pm

**Desmond Chung** Oh okay just making sure  
November 12, 2012 at 8:59pm

**Vincent Poy** Actually, TVB Jadeworld will be gone at 12:00AM on November 18, 2012 which is when it will be carried by Dish Networks for \$29.99 per month, it is \$9 cheaper than Directv, I am sure that Directv is keeping too much of the money they collected as both of them have their costs taken from the monthly fee.  
November 16, 2012 at 9:28am

**權權** Is that mean the user will get trouble one day ?  
November 30, 2012 at 9:07pm

**Toyz&More4u - Club TVpad** Why?  
December 1, 2012 at 2:29am

**權權** They told if they find your IP address , they will know where you are , the next step should be cost you \$ 15000 !  
December 1, 2012 at 6:42am

**Toyz&More4u - Club TVpad** do you know how many torrent users out there downloading free movies? These are people downloading American movies, such as Universal Studio, Paramount Pictures etc. these companies are 1000x bigger than TVB and they still can't stop people from downloads. Also there are lots of TVpad users who use TVpad for other channels. They don't even watch TVB. How are they going to sue those people? They would 1st have to prove they use TVpad to watch TVB. So again, using and owning a TVpad is not illegal. Just like if you use an ipad or ipod and install PPS app to watch movies. Does your ipad or ipod become illegal to own and use? Can someone sue you for 15K?

### TVB Drama does not Work

by [DarkKnight22](#) » Tue Jul 08, 2014 7:09 pm

Not sure if its just me or if others are facing the same problem.

The TVB drama app does not load at all. It is the one with the disc Icon. Every time I click on the app, it will either load for a bit and the red mark comes up or the red mark just comes up after I click on the app.

I am connected to the internet and all the other apps seems to work fine.

Other then that, other streaming apps seems to take a bit longer to load then usual, not sure why.

Never experience this before, until about a weeks ago.

Anyone has a solution to this.

Thank you. 😊

MY firmware is up to date and I have also updated all my apps from the app store.

Also did a reset and plug off the power cord.

Don't seem to have any changes. Same issue.

My next door neighbor is also having the same problem.

did you revert back to auto afterwards? Seems to work for me when this happened to me. I changed the DNS to 8.8.8.8 and still didn't work. I went back in and changed it back to auto and it worked.

## **Re: TVB Drama does not Work**

by [DarkKnight22](#) » Sat Jul 12, 2014 11:51 pm

Ya, I did what you mention and it did work for me now, THANKS!!  
but now for some reason for like the HK and China channels, those apps don't even load. After 10 sec or more of waiting, it still in 0kbps to like 15kbps.  
So weird!!!  
Any suggestion on this now?

Also, on the other note, I do have fast and stable internet connection so this shouldn't be the problem and I also I have the latest firmware and updated apps for the TVPAD 3.

## **Re: TVB Drama does not Work**

by [DarkKnight22](#) » Fri Jul 18, 2014 10:06 am

It actually started working normally now.  
Very weird. I guess it was the HK server problems.  
Thanks for the help guys!!!

### **Re: TVB Drama does not Work**

by [Will](#) » Fri Jul 25, 2014 4:52 pm

I brought my TV pad two weeks ago and have the same problem - live stream is working fine but vod is not working. Connection is not an issue since live stream works perfectly and I am connected thru Ethernet cable. Please assist. How do I set DNS server etc? Thanks!

### TVB series recommendations

by [yyh](#) » Thu Aug 30, 2012 2:00 am

Finished watching Tiger Cubs (SDU). Anyone have any recommendations on good TVB series that are still being broadcasted (have not ended yet), so I can either watch it on the TVB app or watch it through the TVB live stream?

### Re: TVB series recommendations

by [yyh](#) » Fri Aug 31, 2012 10:40 am

Ok, I'll start:

Currently watching Divas in Distress ( no, it's not a drama for women 😊 ). It's a comedy. More info:

[http://en.wikipedia.org/wiki/Divas\\_in\\_Distress](http://en.wikipedia.org/wiki/Divas_in_Distress)

ps. I thought most of you wanted a forum for TVB drama discussion, where is everyone?

I am having lots of trouble looking for new tab series to watch on my tvpad. Can somebody tell me which app they use and how many tab series are usually available? My tvpad app only has about 8 series and they don't seem so good. Thanks!

You have the right app and what you see is what you get. It's the latest and current series in 2012. No older ones.

### ☹ [TVpad2 \(M233\) and TVpad3 \(M358\) app download ONLY.](#)

by [clubtvpad](#) » Wed Jan 30, 2013 5:56 am

**If you updated your firmware and lost all your HK and Korean apps. Please follow the instructions below. You MUST download the Quick Install Utility to re-install the apps. Most of the HK apps are available for download in this post, but the easiest way is to install the N+ Store app and access the N+ store to get the latest version of the HK apps.**

**For TVpad1 M121(s) please go to our TVpad1 download section.**

**Install the N+store app from link below. Within the N+Store you will find all the missing apps from the regular appstore. This includes all the apps below.**

**Download from [here](#) directly.**

**FOR CHINESE INSTRUCTIONS SEE LINK BELOW.**

<http://www.tvpadfans.com/thread-46929-1-1.html>

**Please follow the instructions below to install 3.70, 3.80, 4.08 and 4.18 apps.**

**HOW TO INSTALL APPS on TVPad 2 and 3 using quick install utility. Credit to Kingofthekings**

**\*\*All apps below must be copied to a FAT32 USB drive (do not place files in a folder on the usb, must be at root level).**

Once you have all the apps (.pkg) and the quick install utility on your USB drive. Insert the USB drive to your TVpad's USB port. A menu will come up. Select the 1st option and begin the auto install. When finish, exit to main menu and you should have all the apps you have downloaded.

**0. You must download this app quick install utility**

**3.8 to 4.18 VERSION 3 apps package download (includes the apps below. **You will see the app name with #3 after you install**)**

You can download all the current apps including one that are not in tvpad store.[/color]  
 You will still need the quick install utility to install the apps. See below for download link!

## [TVpad2 M233 Games 3.70 ONLY](#)

by [clubtvpad](#) » Mon Feb 04, 2013 5:42 am

These games will only work if you have the exclusive TVpad game controller and TVPad2 M233 with 3.70 firmware only. **WILL NOT WORK WITH 3.80 FIRMWARE!**

Download and [unzip](#) all files to the root of your USB drive.

Insert your USB drive to TVpad. A menu will come up asking you to install or uninstall app. Select the 1st option from top. It will auto install all games for you.

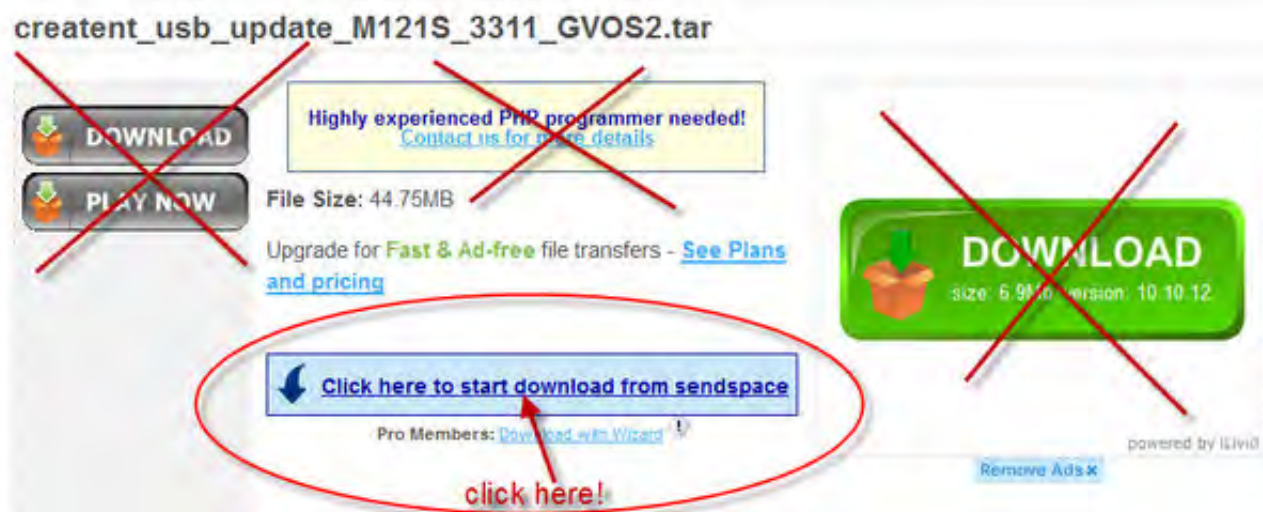

For game instructions and description go [HERE](#)

## [M233 TVpad2 3.80 New games](#)

by [clubtvpad](#) » Sun Jun 09, 2013 4:13 am

**THESE GAMES ARE FOR 3.80 FIRMWARE ONLY. 3.70 GAMES WILL NOT WORK WITH 3.80. IF YOU HAVE 3.70 FIRMWARE PLEASE DOWNLOAD GAMES ABOVE THIS POST.**

**You will still need the quick install utility for 3.80. Please download [HERE](#)**

**DO NOT INSTALL ALL GAMES, TVpad internal memory can not hold all games. We suggest 12 games max on TVpad. If you install more than 12 games, TVpad may hang and lock up, and you will not be able to use the device at all!**

THESE 33 GAMES ARE FOR M233 (TVpad2) 3.80 FIRMWARE ONLY. 3.70 GAMES WILL NOT WORK WITH 3.80. (thanks to Sudhera for the links)

These games will only work if you have the exclusive white TVpad game controller and TVpad2 M233 with 3.80 firmware only. WILL NOT WORK WITH 3.70 FIRMWARE!

**You will need the quick install games utility for 3.80. Please download [HERE](#)**

Download and unzip all files to the root of your USB drive.

Insert your USB drive to TVpad. A menu will come up asking you to install or uninstall app. Select the 1st option from top. It will auto install all games for you.

😊 enjoy !

**Download ALL the games [here!](#)**

TVpad2 (M233) and TVpad3 (M358) app download ONLY.

by clubtvpad » Wed Jan 30, 2013 5:56 am

If you updated your firmware and lost all your HK and Korean apps. Please follow the instructions below. You MUST download the Quick Install Utility to re-install the apps. Most of the HK apps are available for download in this post, but the easiest way is to install the N+ Store app and access the N+ store to get the latest version of the HK apps.

For TVpad1 M121(s) please go to our TVpad1 download section.

Install the N+store app from link below. Within the N+Store you will find all the missing apps from the regular appstore. This includes all the apps below.

Download from here directly.

12/13/2014 Club TVPad • View topic - TVpad2 (M233) and TVpad3 (M358) app download ONLY.

FOR CHINESE INSTRUCTIONS SEE LINK BELOW.

<http://www.tvpadfans.com/thread-46929-1-1.html>

Please follow the instructions below to install 3.70, 3.80, 4.08 and 4.18 apps.

HOW TO INSTALL APPS on TVPad 2 and 3 using quick install utility. Credit to Kingofthekings

\*\*All apps below must be copied to a FAT32 USB drive (do not place files in a folder on the usb, must be at root level).

Once you have all the apps (.pkg) and the quick install utility on your USB drive. Insert the USB drive to your TVpad's USB port. A menu will come up. Select the 1st option and begin the auto install. When finish, exit to main menu and you should have all the apps you have downloaded.

0. You must download this app quick install utility

3.8 to 4.18 VERSION 3 apps package download (includes the apps below. You will see the app name with #3 after you install)

12/13/2014 Club TVPad • View topic - TVpad2 (M233) and TVpad3 (M358) app download ONLY.

<b>BETV</b> BETV is an app that provides live Chinese TV programs, covering channel resources including news, finance, parenting, entertainment, sports, and local satellite TV channels.	<b>BETV HD</b> BETV HD is an app that provides live HD Chinese TV programs, covering channel resources including news, finance, parenting, entertainment, sports, and local satellite TV channels.
<b>BETVII</b> BETV is an app that provides live Chinese TV programs. ### [Re: Movie Valley with English Categories](#)

by [aptech2000](#) » Thu Apr 04, 2013 1:41 am

*coolwing wrote:* Thank you so much! I was wondering if anyone used the "Favorite" function within M Valley and how, they have so much content that I would like to bookmark some of them. Thanks

That's very easy, just go to the individual title that you want to save, and push the "Favorite" button on your remote, you will see a check mark flashes for a second to tell you that it was saved successfully.

The next time when you go to Movie Valley, you can go directly to "My Favorites" category, and you should see all the saved titles there. If you need to remove it from the list, just push "Menu" button on the remote, 2 choices will pop up, the top button says "delete", and the bottom button says "Cancel".

Yes the translations work on all TVPad versions 🏠1420

Maybe you are referring to the app located at [viewtopic.php?f=3&t=282](http://viewtopic.php?f=3&t=282) ?

## [Re: Movie Valley with English Categories](#)

by [Whoopie](#) » Thu Jun 26, 2014 6:41 pm

I have just purchased TVpad3 but do not read Chinese. Do the recorded HongKong TV shows automatically get updated? How long are they kept in the system? Which is the Movie Valley app?

I would really appreciated your help if can you tell me how to find apps for English, HongKong, Japanese and Indian shows. 😊

## Re: Movie Valley with English Categories

by [clubtvpad](#) » Thu Jun 26, 2014 7:18 pm

yes shows are updated by TVpad company. There are not too many english apps since this is targeting an asian audience. You can try these.

Movie Valley

American drama

Japan live NiJi app

Anerican movies

Hong Kong drama, variety shows, live TV, replay TV all in one app.

HK drama series

#1423

HK 12 hr delay

HK Live tv with replay and guide.

The last few apps requires the N+Store app and is not found in tvpad store. You can find the download in our download section, use link in my signature. The above should get you started. Why didn't you ask your reseller for this info? Shouldn't they have this info for you?

Are all of these channels available for only the latest firmware version? I think I am still on 3.06 factory firmware.

There is no more capable or flexible app than the Phantoman app created by our resident guru. It runs on all firmware and hardware versions. That program, plus a little initiative and some googling skills will present you with a new universe of both live and VOD resources that will enhance your TVPAD experience beyond the default Sino/Korean centric channels.

You can also find many user provided channel lists to give you a starting point. Just remember, the streaming URLs found here and elsewhere are subject to change at a moment's notice.

Username Chengye is a good source for source URLs.

Good luck

## Annoucements and Updates 4/16/14

by [clubtvpad](#) » Tue Jul 10, 2012 12:36 am

4/16/14

TVpad 3.70 to 3.94 upgrade released. Users who are on 3.70 will get a pop up asking them to upgrade to 3.94. Keep in mind this upgrade will erase all pre-installed apps. You will have to re-install all apps.

3/27/14

TVpad2 UPDATE: Auto Update for 3.94 is now available for TVpad2 users. Go to settings - update system to begin update. For best results use cable network. Wifi update may take a lot longer. Do not panic if it seems like it is stuck at 6%. Take about 10-15 minutes to update. Apps DO NOT need to be reinstall. So don't worry about losing your apps!

2/17/14

Please help me welcome WELTV staff member WELTV-FRANK. He will help answer any WELTV questions and issues! [viewtopic.php?f=37&t=2358](#)

2/16/14

URGENT TVPAD3 Announcement - TVpad HK will release 4.18 Firmware AUTO UPDATE later this evening to a group of selected mac addresses. If your mac address is selected, you will get a pop up message informing you that a Firmware upgrade is available with instructions. AGAIN THIS IS ONLY FOR A SELECTED GROUP OR REGION. SO KEEP AN EYE OUT FOR IT. If you are one of the lucky ones to get it and is successful in getting the update. Please post here or on our forum so we can keep track of the success rate. Thanks and please share the info with your tvpad friends.

12/13/2014 Case 2:15-cv-01869-MMM-AJW Document 23-5 Filed 03/10/15 Page 212 of 303 Page ID  
#1452  
2/14/14 Happy Valentine's day. Successfully tested AUTO FIRMWARE Update from 4.0 to 4.18. Works very well see our report [here](#).

2/13/14

We just released TVpad2 3.94 firmware upgrade. Which should fix all the issues caused by the outages. See details [here](#).

2/7/14

TVpad servers are still having issues and some customers are still not able to get the GM, if they do get GM, they are not able to access the app store or use any of the apps.

To fix some of these issues, TVpad HK released a few new apps. However, you can only get them from the N+app. It is not available to the public as a regular download because they reported that the reason the current apps are having issues is because the hackers are now attacking their apps and content servers. The new apps are for TVpad 2 and 3: [516網路電視3](#), [BETV\\_HD3](#), [BETV3](#), [KKS3](#), [Solive3](#), [体育online3](#), [粤海寬頻3](#), [粤海時移3](#) and [粤海寬頻3](#). (we will release these apps in the donor section for TVpad1 with 3.26 firmware).

1/29/14

TVPAD3 Firmware upgrade 4.18 was released. Please do not upgrade if you are using any custom apps such as remote+stream, phanto and recorder apps. We have not tested our custom apps with the new firmware yet. So upgrade at your own risk. If you don't use any custom apps feel free to upgrade.

1/25/14

We officially added WELTV to our product list. It is a TVpad, iplayer i5/i8/i9 killer! Watch our video demo [here](#) and check out our [current promo](#)!

iPlayer promo: Watch all 180+ channels for free between 1/30/14 to 2/15/14. If you like you can subscribe to get all the premium channels after the promo.

12/30/13

TVpad servers are 90% restored. 10% of users out there are still having issues getting the green man. If you are affected. Leave your TVpad on over night and the green man should come back and you can watch. However, do not turn off your TVpad or else you will loose the green man again. Keep the unit at the main menu and just turn off your TV until further notice. For more details see our outage report post [here!](#)

iPlayer news - we just released the latest i5 firmware that removes the annoying desktop widget and also updated some of the local apps. Download the new firmware [here!](#)

7 day playback app with EPG has been released. Currently only CCTV1 through CCTV6 is available, more channels will be added over the next few weeks. To update, just launch the app and install the update when prompted. For S3100 users, you can download the app from our iplayer download section.

10/5/13

As most of you may have noticed, TVpad servers were hacked on 10/3 and we have been out of service for a couple of days. TVpad has now fixed the issue and everything should now be back to normal. If you are still having issues please visit our general forum for support.

10/1/13

Club TVpad is now an official Authorized Reseller for the iPlayer. A 100% android base IPTV media

player. Please check out our video review [HERE](#) #1453

9/25/13

我爱K歌 app has been updated with new categories with 3000+ songs!

TVpad3 Release date has been postponed to 10/8/2013

9/24/13

TVpad3 Specs released! See detail info <http://clubtvpad.com/forums/viewtopic.php?f=27&t=1633>

9/17/13

Over the past week or so, TVpad released a handful of new apps. 3 apps that may interest you is the new HOT Korean Drama app, India TV app and New American Drama App. All available in TVpad Store!

8/1/13

New N+Store app released. This is an enhanced version of the Appstore. Install this and you will get access to some HK apps.

7/17/13

More apps released in TVpad app store. A handful of new apps are in Cantonese. (thanks to a forum member goodan)

欧陆苍穹下 Under The Skies of Europe

香港歷史 History of Hong Kong

計算文明 Math And The Rise of Civilization

and two TVB shows from 2012

玩轉三周1/2 TV Funny

歷史補習社 Crazy for History

6/8/13

3.80 games for TVpad2 have been updated and released for download. [CLICK HERE](#)

6/5/13

New BETV2 app released for TVpad2. This app is similar to 粵海寬頻2 with both live streaming, VOD and tv guide.

6/1/13

TVpad 2 firmware 3.80 released! Please visit our download section for instruction and download!

5/19/13

港粵快看 new version!! This version supports continuous play. 3.26 and 3.70 version of the app can be found in our download section. New firmware for TVpad2 M233 will be released towards the end of the month. This will fix the black side bar issue and also some lip sync issue with some apps.

4/21/13

Super break through by our Hacker team! 粵海寬頻2 released for M120/M121(s) model. See link: [viewtopic.php?f=3&t=1270](http://clubtvpad.com/forums/viewtopic.php?f=3&t=1270)

4/20/13

2 new apps added to TVpad store for installation see link: <http://clubtvpad.com/forums/viewtopic.php?>

3/14/13

A few new apps have surfaced for TVpad. A new site has also been released for TVpad2 app download. Check it out!

<http://www.appnnn.com/tvpad/>

2/4/13

Games for TVpad2 finally released for those who bought with the gift pack. You can download from our forum.

The games are:

百米冲刺、快乐蹦床、欢乐赛跑、快乐豆豆、快乐乒乓、路亚钓鱼、拳击擂台.

[viewtopic.php?f=13&t=1040#p8421](http://clubtvpad.com/forums/viewtopic.php?f=13&t=1040#p8421)

2/1/13

Apps in TVpad2 are now available for all models of TVpad M120, M121 and M121s.

1/26/13

01/08/13

TVpad2 (New Model) will be released sometime during Chinese New Year! See the promo ad and also a video review to follow.

[viewtopic.php?f=10&t=966](http://clubtvpad.com/forums/viewtopic.php?f=10&t=966)

12/09/12

THE FIRMWARE FILES RELEASED BY TVPADFANS FORUM WERE NOT THE RIGHT FILES. THEY UPLOADED THE WRONG FILES AND SHOULD NOT BE USED. FIRMWARE RELEASED BY CLUB TVPAD ARE THE CORRECT .TAR FILES AT 45MB. ANOTHER REASON TO FOLLOW CLUB TVPAD FOR UPDATES AND INFO. WE KNOW WHAT WE ARE DOING AND ACTUALLY TEST FILES BEFORE WE RELEASE.

12/07/12

KTV App released to Club TVpad forum users. 3.26 firmware released.

12/05/12

New firmware 3.26 will be released on 12/07 according to TVpad. What's the difference between 3.14 and 3.26? See link for info.

<http://clubtvpad.com/forums/viewtopic.php?f=10&t=800>

12/2/12

Here's a review and demo of the latest KTV app. [viewtopic.php?f=9&t=786](http://clubtvpad.com/forums/viewtopic.php?f=9&t=786)

11/25/12

TVpad release second AD on Norcal SingTao Daily and New York World Journal. See ad here

[viewtopic.php?f=10&t=751](http://clubtvpad.com/forums/viewtopic.php?f=10&t=751)

11/18/12

TVpad released official response to TVB's allegations. <http://clubtvpad.com/forums/viewtopic.php?f=10&t=722&p=5470#p5470>

11/12/12

Confirmed with TVpad official that HOTV is no longer available. The provider has stopped providing content to TVpad. A replacement app is in the works. Once we have more info we will share with the board.

10/31/12

We have notified TVpad regarding Korean contents not being updated. They are aware of the issue and is working with the vendor in updating the content and said it should be updated by next week.

10/26/12

As promised! with 220 facebook likes we will release 3.06 to 3.14 firmware upgrade package. This is an official TVpad release link.

[viewtopic.php?f=13&t=6&p=6#p6](http://clubtvpad.com/forums/viewtopic.php?f=13&t=6&p=6#p6)

New Vietnam Video On Demand app released in App Garden. App name "V-Sen"

10/25/12

App Garden server error. Users are reporting an error when accessing App Garden **"There is no the recommended App List"**. This is a server issue and TVpad is looking into it. In the mean time please download apps from our download section and install using USB drive. Once server is fixed, you can download the missing apps not in our download section. **(server problem resolved on 10/26!)**

10/9/12

Testing new 3.14 upgrade package for 3.06. After upgrade it erases all your apps!!!! Have to reinstall all from scratch! (wonder how many of you will see this announcement).

10/7/12

TVpad officials has announced that the Niji app will remain temporarily out of service. This is due to the conflict between Japan and China. There is no ETA and no reports of a replacement app at this time. However, they are furiously working on a solution for our Japanese customers. TVpad ask customers to be patient while they try to work things out.

10/4/12

We just received the latest batch of M121s with the latest firmware 3.14. Fixes the lag issue with the remote and seems to boot up a bit faster. Or maybe it's just my imagination. Have to keep testing. Hold your horses....I know the next question is where is the firmware upgrade. It's coming should be released soon. I'll let you know once I find out.

10/1/12

Outage notification: Niji, Youku, youtube, cnn and discovery channels are all out of service at this point. We have reported the issue to TVpad. However, they are still on National Week Holiday and don't think the issue will be looked at for now.

Edit: **For Firmware 3.0 Youku and Youtube app are fixed**, new version have been updated again. Please go to app garden and update to latest version. Youtube 4.20 and Youku 2.50. Niji app also has a newer version 2.32 but still doesn't work after upgrade.

Firmware 2.72 youku app has also been updated. Please download from our download section. No fix for youtube or Niji for 2.72 yet.

9/29/12

TVpad started their holiday for China's National Week. They won't be back until 10/8/12. With that said, they are not taking any support/outage etc during this time. We will just have to wait till they get back to resolve any issues.

9/21/12

Along with the fixed apps, TVpad also released a dozen new apps in app garden. I uploaded a snap shot of all the new apps. See link below!

[viewtopic.php?f=9&t=419](http://clubtvpad.com/forums/viewtopic.php?f=9&t=419)

9/20/12

载优酷看看（含2.72及3.0版本）、华夏剧场, 每日焦点, 热辣综艺 and 老电影HD has been updated with new versions. All download links have been updated in our download section.

9/9/12

NamTV (Viet app) will not be released for another month. Stability and channel line up still an issue.

9/4/12

TVpad released TPdoctor.pkg utility to fix wifi connectivity issues and apps that can't be installed or can't download from App Garden.

*This utility will only work with firmware 3.06*

Features:

Improves wifi module behavior

fixes wifi connections that can't login to your wifi network after TVpad reboot.

fixes App library issue. For those who can't download apps from App Garden or can't see certain apps.

fixes app icon placement after installation.

Added MD5 Checksum to improve application management.

[viewtopic.php?f=13&t=294](http://clubtvpad.com/forums/viewtopic.php?f=13&t=294)

8/26/12

Brought to you by Club TVpad! 粵海時移 Hong Kong time shift app released!

[viewtopic.php?f=13&t=130&p=1141#wrap](http://clubtvpad.com/forums/viewtopic.php?f=13&t=130&p=1141#wrap)

8/25/12

港粵快看 server upgrade completed. The buffering issue should now be resolved.

8/24/2012

粵海時移 Test review - see my review notes below!

<http://clubtvpad.com/forums/viewtopic.php?f=9&t=148&p=1911#wrap>

8/12/12

Club TVpad again 1st to release news of Vietnamese app NamTV.

[http://www.youtube.com/watch?v=LKUzsdqx\\_yk](http://www.youtube.com/watch?v=LKUzsdqx_yk)

8/8/12

TVpad officials informed us that they are working with the manufacturers to put 512mb in TVpad M121s. I assume they are waiting to deplete the 1st batch of inventory before they make an official announcement. I believe they've gotten many complaints of false advertisement that they are now trying to cover their tracks.

8/1/12

Folks, looks like TVpad marketing group made another mistake in reporting that M121s has 512mb of internal ram. TVpad has confirmed it has the same amount of ram as M121 256mb. So our earlier report that M121 and M121s are identical in hardware is 95% correct.

7/31/12

TVpad released a new test remote app for firmware 3.0. Unfortunately it's for android devices only (tablet, android phones etc) iOS version will be released later, no dates were given.

7/22/12

Hello TVpad fans! Again Club TVpad is the 1st to report breaking news to the TVpad community!

More firmware 3.0 update! As mentioned in our last update, 3.0 should be released at the end of August or early September. Don't be too excited! The release will be with a new purchase of TVpad M121s model! WHAT M121s??? You ask? This is to promote TVpad as an international model. Initially it will allow you to play both Chinese and Korean Apps. When Viet, Thai and Hindu language apps are released, it can be installed on the M121s.

### What is the difference between M121 and M121s?

**\*NOTHING!!!!** It's all part of TVpad's marketing strategy. The hardware is identical to M121. The only difference is M121s comes with firmware 3.0 and the retail box will be redesigned and the price will be set at **\$259US**.

**\*At the time of this update on 7/22/12, TVpad did not release the new hardware info to us, we were told it would be the same. Later it was brought to our attention that there is a minor difference in chipset and internal memory. \*(8/1/12) Internal memory of 512mb is false. TVpad has admitted M121s has only 256mb.**

The only difference between TCC8901 and TCC8902 is the newer chip has 3D graphic support. You will still need a 3D TV to take advantage of this feature.

Table 1. Comparing Difference Between TCC8900/01/02

NO	Function	TCC8900	TCC8901	TCC8902	Remark
1	SATA	O	-	-	
2	LVDS	O	-	-	
3	3D Graphic Engine (Internal)	O	-	O	

*chipset info*

tc8901.2.jpg (20.53 KiB) Viewed 13825 times

## **App Garden!**

This is TVpad's app store! See pics of app garden and 3.0 below

<http://clubtvpad.com/forums/viewtopic.php?f=10&t=68>

## **Will my current M121 be outdated?**

Absolutely not! Again M121 and M121s are identical. Current M121 owners will have the option to update to 3.0 to take advantage of the new interface and new features. Here's the catch.....3.0 firmware WILL NOT be released to the public immediately until M121s is on the market for a while. Again, another marketing strategy to get new customers who wants to play Korean apps to purchase the more expensive M121s model.

## **What does this mean to the Korean M311 and current M121 models?**

Once the M121s is released, Korean M311 model will be discontinued. It will still be supported by TVpad, but will no longer be available for purchase. As for the M121, it will be repackaged with firmware 3.0 and new retail box and sold to consumers with the new price hike.

## **Should I wait for M121s or buy the current M121 model?**

This is a personal preference option. You can wait and pay a lot more for a M121s or save some money and just get the current M121 at the current price. You can later update to 3.0 when available to get the same features as M121s. The only people I recommend getting the S model are those who need to watch Korean channels and Korean VOD. Or if you are a balla and money is not an object to you. The M121 model will be an HOT item once M121s is released because it's the same in hardware but a lot cheaper! Especially for those who don't care about other language apps. I'm sure local resellers will raise the price of M121 because of the demand. You will definitely see a price increase on ebay as well.

This breaking news is brought to you exclusively by Club TVpad, the #1 online TVpad resource site!

How do you feel about this update? Share your thoughts and comments with us!

7/17/12

Firmware 3.0 update. The much anticipated 3.0 firmware has once again been delayed, now they are saying late Aug or early Sept. We did find out with firmware 3.0 you will be able to install other language apps, such as the Korean app and later even Vietnamese, Thai and Hindi apps. Once released, they will market it as an International model and possibly raise the price to \$259.99. If you haven't bought a TVpad yet, I suggest getting it before 3.0 is released. The price hike is not just for buyers, but resellers as well. This info is speculations only and it may or may not happen. TVpad management is still indecisive on what they will do at this time.

7/11/12

TVpad released new 港粵快看 (updated version) Quick Look TVB app and Club TVpad is 1st to give this to our registered members. You can find it in our TVpad Apps Download section. For more info and reviews from other users who has installed the app see link below.

<http://clubtvpad.com/forums/viewtopic.php?f=9&t=24>

7/11/12

Korean VOD apps are no longer playable on TVpad M121 models. TVpad has modified the streams to detect the model being used and deny access if it is not the the Korean model.

7/9/12:

We have some very positive news from TVpad. They are testing Vietnamese, Thai and Hindi streams. Sounds like they are planning to release apps for these languages and expand to more Asian communities!

We are slowly updating this forum with more TVpad info. If you like to help, we are looking for mods to help out with Tutorials, instructions and general info. PM me if you are interested.

M120 does not have AV output only HDMI also no TFcard/micro sd support only USB connection. No power indicator light.

M121 has all of the above.

Does this mean that everytime China has a bust up ( Disagreement) with its neighbours TVPad will pull the plug ( stop the broadcasts ) of the country it is having a disagreement with. This is a very petty attitude for China and TVPad. There is an international court for these disputes USE IT and let us Little People get on with our lives.

The decision to stop broadcast is not from TVpad. It is the company that runs Niji Show. TVpad has little control over it's vendors and what they can and can not do.

## I LOST ALL Hong Kong and Korean APPS AFTER FIRMWARE UPDATE!!

by [clubtvpad](#) » Sat May 03, 2014 8:57 pm

**If you have a TVpad2 (M233) with 3.70 firmware. TVpad recently sent out pop up messages for everyone to update to 3.94 firmware. After you updated the firmware, all apps have been deleted. This is because 3.70 apps does not work with the new firmware and you must download the latest version of the app.**

**You can find the instruction and download links for TVpad2 and [3 HERE](#) !**

**\*\*If you have TVpad1 models M120, M121 and M121s. The above does not apply to you. If you need apps you can download them from our download sections.**

HI I down loaded the install utility auto exec file onto my USB - however my TVPad 2 with 3.94 does not see it. I have tried a few times and downloaded software a few time also - not working. I used my mac to download onto USB.

Can you be clear on what you have downloaded? There isn't any exe files.

There is no password for the zip file. Sounds like you downloaded a corrupted file. Try downloading it again with a PC if you were using a MAC.

It looks like the Hong Kong apps have been removed from the N+ Store. Does anyone know how to get the Hong Kong apps?

That is correct, it has been temporarily removed for maintenance. Hopefully it will be back in the store soon. In the mean time you can download all the apps from the link below.

## TV Pad 3 plays and after a while hangs

by [kelvinkris](#) » Sun Nov 16, 2014 5:47 am

Hi,

I've bought a TV pad 3 yesterday and tried to watch movies and also dramas.  
I noticed that I have abnormal error 1 on network test but apps can still play.  
However after a while, the TV pad will hang with the sound repeating in the background.  
I went back to the vendor, he tested it and it is ok.  
He even swapped a new set for me but the same thing happened.  
I tried troubleshooting by connecting cable and wireless but problem still persist under both scenario.  
Then I tried using my old modem hoping it is my current DSL modem that is incompatible but problem persists.  
Not sure what to do next.

Living in Sydney running on TPG ADSL network.  
Speed test shows 13Mbps.

Can anyone help?  
Thanks

Kelvin

Try to change your network setting to manual, change you DNS to 8.8.8.8. to see if it better.

Thanks for the prompt reply. I'm running on Wifi so there isn't this page to set 8.8.8.8. But I've tried using this DNS section when I tried it on lan and it still hangs. Not sure what to do.

Hi Phantom,

When I hangs, i power off and on again with the controller.

The way it hangs is the TV repeats the last sound continuously.

Eg. if it hangs while a car honks, it will be " B B B B B....." Until you power off.

I'm not sure what's wrong.

Swapped modem, changed unit and problem persists.

how about trying it with another TV? Also make sure your unit is well ventilated.

Unfortunately i only have a tv in the living room.  
is it possible that it is caused by settings in router?

If you have to power off/on again as opposed to exit and reopening the app, then I believe it must be a hardware issue. Maybe your TVPad is somehow overheating. When it hangs, does it feel very hot when you put your hand on the top of the TVPad ?

It cannot two TVpad having same symptom & it work good on your vendor too.

Seem like you have a noisy power line on which your TVpad plug on.  
Try test it on other room or use filtered power strip.

Thanks for the tips.

It doesn't feel hot on the tv pad.  
Also, I have changed a second TV pad with the same issue.  
And it was tested back at the vendor and its playing fine.

## TVPAD OUTAGE UPDATES 8/30/2014

## TVPAD OUTAGE UPDATES 8/30/2014

by [clubtvpad](#) » Wed Feb 20, 2013 5:15 am

8/30/14

Currently there are several server outages reported. However, not everyone is affected. Issue has been reported to TVpad and they are working on restoring service ASAP.

Update:

6-14-14 - World Cup outage

It is obvious that TVpad servers can't handle the demand for WORLD CUP viewers. On top of the constant reports of hacking attacks this is very upsetting to many TVpad users. We here at Club TVpad understand your frustration and is working with TVpad HK and pushing them to do more for their customers. Please understand we do

#1492

not maintain or manage their servers so we as resellers can't do much. We are at their mercy and hope they have the man power and resources to keep up with the current and future demands.

Good news is for those with a second device such as WELTV and iPlayer, these players have less outages during the world cup. With that said we are extending our father's day/world cup promotion to get WELTV and iPlayer at a discount. See [here](#) for details.

2/16/14 - All services should be restored. If you are still having issues. Please see below update info for links to either update apps or firmware.

2/13/14 - We just released TVpad2 3.94 firmware. This firmware

along with TVpad3 4.18 firmware should fix all the issues we've been having. See detail for 3.94 [here](#). After you update your firmware, you should also update the apps.

2/11/14 - The below issues from 1/31 to present is still ongoing (90% fixed). This includes no GM, error 4,5 and 8 codes. TVPAD HK released a new firmware 4.18 for TVpad3 customers. Please update to this new firmware if you have a TVpad3. You can download the firmware from our download page.

If you cant access the app store, you can see phantom's temporary fix [here](#).

TVpad HK also released a few new apps to fix the app issues when it doesn't load. However, you can only get them from the N+app Store. It is not available to the public as a regular download because they reported that the reason the current apps are having issues is because the hackers are now attacking their apps and content servers. The new apps are suppose to fix some of these issues caused by the hackers (not us 😊). These apps are for TVpad 2 and 3 and can be updated by using the N+app or download them from our [download page](#): (516網路電視3, BETV\_HD3, BETV3, KKS3, Solive3, 体育online3, 粵海寬頻3, 粵海時移3 and 粵海寬頻3. (we will release some of these apps in the donor section for TVpad1 with 3.26 firmware).

2/3/14 - 粵海寬頻2 and a few other apps are still not working. Please try using [粵海直播](#) for live channels or [港粤网络电视](#) instead.

2/2/14 - most are back online, but now AppStore doesn't seem to be working. If you need to install apps, please try our download page or use appnnn.com.

1/31/2014 pm. TVPad outage update. According to TVpadfan forum

admin. They are experiencing severe power outage (new excuse). That is why most users are not able to watch TVpad even with GM.

In addition, there is a new app in N+store app that is recommended to watch HK channels. The app is called 粵海直播 and should work during the outage. See details [here](#).

1/31/2014 am. Some users are reporting even with GM (green man) they are not able to watch TV. It could be an app issue, try HITV for HK channels. Some are able to resolve this by setting the time zone in Settings - Time Zone.

1/29/2014 - User does not exist error no green man is back! Some users are seeing this again. Just keep TVpad on and wait 15-20 minutes for the green man to come back and you should be able to watch again. Keep in mind TVpad HK are short staffed and they are still on 2 weeks vacation for CNY.

1/17/14 - Looks like the issue is getting worse, more customers are having the no green man issue and still getting USER DOES NOT EXIST error. Please follow the recommendation below leaving TVpad on. Some customers reported green man after 15-20 minutes, some reported they had to wait a few hours. Once you have the green man, do not turn off your TVpad. Just keep it on so you don't lose the green man again.

12/28/13 TVpad HK has reported that they have been hacked once again, service is affecting some users but not all - If you are still having issues, please reboot your modem and wifi router first. If that fails, **please leave TVpad on and wait for the green man to show up. It can be in 5 minutes or a few hours. But once you see green man, do not shut down TVpad.** Keep it on until they restore service indefinitely.

Are you getting "USER DOES NOT EXIST" error? If so check the following:

1. Your internet connection.
2. Little man icon has to be green. (TVpad server authenticated your tvpad successfully if green)
3. 2 computer icons must be blue. (this shows your tvpad is connected to the internet and has a valid IP)
4. If you are using wifi, make sure you are connected to your wifi network.
5. do a network test.
6. **If your connection is successful and still doesn't work. Try changing the DNS manually to one of the following 61.139.54.66 or 8.8.8.8 or 4.2.2.2**

NOTE: Some resellers are getting TVpads banned and you will get the same error message. Contact your reseller, they would have to contact tvpad HK to unblock your tvpad. This is why you want to purchase from a trusted source. Just because they say they are authorized resellers doesn't mean it is true. If you bought from ebay or paypal ask for your refund and file a claim.

If you have been banned due to your reseller, please post your reseller here so others can avoid.

by [fungp83](#) » Sat Mar 23, 2013 8:57 am

Hi,

I have the exact situation where the man icon isn't turning green and shows up with the error message as mentioned. I have returned the tvpad to the seller in Glasgow, Scotland where even the new device still don't work.

Is there anything I can do? For a fact nothing to do with internet connection as I use the internet day in day out.

Please help.

Thanks

### **Re: USER DOES NOT EXIST or can not be Authenticated ERROR!!!**

by [Phantoman](#) » Sat Mar 23, 2013 6:05 pm

So are you saying that even with a new device you are getting the same error message ? In that case, did the reseller show you that this new device worked before he gave it you ? He might have given you another blocked device for all we know. Actually did the TVPad ever work for you ? Have you tried it at someone else's place ?

by [fungp83](#) » Sat Mar 23, 2013 6:22 pm

Hey Phantoman, Yes even with the replacement device the message still appear.

The seller just gave me a brand new device from another box, which was sealed so thought nothing much of it.

I have tried it in another property and that worked fine, only had issue in my place. I have no idea why its not working at mine.

worked at another property...but not at yours...internet issue

who is your internet provider?

the other property that you tried at...was it the same internet provider?

### **Re: USER DOES NOT EXIST or can not be Authenticated ERROR!!!**

by [Almighty1](#) » Mon Jun 10, 2013 5:46 am

I have a question that hopefully clubtvpad knows the answer to. How does TVpad actually do their blocking as what I have noticed was that the TVpad2's I had seen at one store, all had the same serial number on the sticker on the outside packaging box but the TVpad2 itself does not even have a serial number. They all have individual MAC addresses which is required for networking. Does each vendor get batches with the identical serial number for that batch to distinguish it from what another vendor gets or do they really track using the MAC addresses?

Hopefully they don't incorrectly blacklist a MAC address of a good vendor. Now I wonder, where do these bad vendors get their inventory from and still able to sell at the same price unless these things are very cheap in wholesale and have a high markup.

## [影视谷 some shows not working](#)

by [olee](#) » Fri Sep 14, 2012 3:44 pm

I went into 影视谷 and tried some old American series (ie, Friends season 1,2,3, House, Nikita, etc). None of them work. Any one have the same problem?

### **Re: 影视谷 some shows not working**

by [twosuctioncups](#) » Tue Sep 25, 2012 3:03 pm

Same here, I have tried NCIS, CSI, House, Friends, I can see the a few KBs being sent every 2 seconds or so ... guessing that this is my attempt from the app to connect to the server with no response - retrying a few times before the transmission stays at 0KB/s for food. it looks to me that the server is not responding or the app is connecting to the wrong server. will appreciate if someone find out the root cause and the cure.

by [seemore](#) » Wed Jun 19, 2013 4:56 pm

only 影視谷 and 港粵快看 and 粵海寬頻 servers are blocking my ISP addresses? other apps working fine

The speed stays at 0 kps and it was not buffering. I unplugged tvpad from router and connect it directly to my DSL modem and same result so I know it is not my router issue. I am using charter Internet in California. try other house same charter internet working fine all apps, If anyone have idea that would be great. Thank you.

Try manually changing your DNS to 8.8.8.8 or 4.2.2.2

## **Re: Feedback on 4.1.8 Firmware update**

by [clubtvpad](#) » Wed Jan 29, 2014 2:45 pm

Please do not upgrade if you are using any custom apps such as remote+stream, phanto and recorder apps. We have not tested our custom apps with the new firmware yet. So upgrade at your own risk. If you don't use any custom apps feel free to upgrade.

## [Slow video with fast internet. Please help.](#)

by [turtlestrap](#) » Thu Jul 03, 2014 2:01 am

Hello, I am having trouble with watching video on my TvPad2.  
It says it is streaming at ~160-200kb/s and it is buffering and stuttering all the time and is unwatchable.  
Here are speedtest results to a server very close :

and a server in Hong Kong

I can watch 4K video on YouTube with no problem, but the TvPad2 struggles with 160-200kb/s.

I have the TvPad2 connected with Ethernet cable to my modem.

Any help would be greatly appreciated! Thanks!

### [Re: Slow video with fast internet. Please help.](#)

by [Phantoman](#) » Sat Jul 05, 2014 3:00 pm

TVPad uses the SopCast P2P protocol for live streams, assuming you have ADSL then one theory could be that it's killing your upload bandwidth which in turn kills your download bandwidth. Are you able to play these 4K videos while the stream is stuttering on the TVPad ?

Oh the another theory would be that your ISP is employing bandwidth throttling techniques for P2P traffic.

## [Re: data usage](#)

by [Phantoman](#) » Wed Jun 05, 2013 6:44 pm

It's difficult to say since you don't really know how much is the total upload unless you have a smart router or something like that. Anyway, there is no real HD on these devices, the source of the streams can be from an HD channel (e.g. ATV HD), but the streams themselves are SD quality. So I wouldn't worry about that.

## Re: data usage

by [Almighty1](#) » Wed Jun 05, 2013 7:18 pm

Maybe there is HD except just like cable/satellite - it's compressed.

## Re: data usage

by [Phantoman](#) » Thu Jun 06, 2013 5:10 am

Believe me, none of these devices have HD 😊 I'm pretty sure they never will if they keep using P2P networks.

## [cant connect tvpad3 to wifi that requires browser login](#)

by [aesop](#) » Sun Jun 15, 2014 10:50 pm

Hi all

I recently got a tvpad3 for my dad who is at a retirement home. They have a fast wifi connection but it requires login details once connected. The actual wifi network is not password protected but requires user name and password login in a browser.

How can i input these details into the tvpad3?

Thanks in advance guys.

Tvpad doesn't have a browser. It's best you get a wifi bridge to connect the tvpad.

### [Re: cant connect tvpad3 to wifi that requires browser login](#)

by [aesop](#) » Mon Jun 16, 2014 2:05 am

I've tried taking my laptop and did the following:

1. connect laptop to wifi connection
2. allows sharing of wireless internet through LAN (also tried bridging wireless and LAN)

2. share internet to tvpad through ethernet cord

The connection is successful according to the tvpad but there is still no internet connection. Is there any resolution?

Can you explain a bit further what you mean by WIFI bridge?

Thank you

Go to settings & do the WiFi setup there.

*clubtvpad wrote:* see this [http://compnetworking.about.com/od/hard ... pter\\_4.htm](http://compnetworking.about.com/od/hard_...pter_4.htm)

Will this device mean I can input the username/password login details? If so how will it do this?

*KMK wrote:*

*aesop wrote:*

1.png

Unfortunately that does not work as the password is not directly on the wifi connection but a user login after the wifi is connected.

## Re: cant connect tvpad3 to wifi that requires browser login

by [clubtvpad](#) » Mon Jun 16, 2014 2:52 am #1532

you set up the bridge to login to the wifi network. Than connect your laptop to the bridge to input the user name and password in the bridge settings. The bridge will than be connected to the internet and you can connect the tvpad to the bridge. I suggest you buy a bridge from best buys or frys so you can return it if it doesn't work.

Thanks for the info. Please correct me if I am mistaken here but if my laptop can connect to the wifi and I am trying to use the laptop as a bridge to the tvpad isn't this the same thing? In this case we're just replacing the laptop with a wifi bridge device?

## [Re: cant connect tvpad3 to wifi that requires browser login](#)

by [clubtvpad](#) » Mon Jun 16, 2014 3:27 am

yes, technically it should work. But MS internet sharing isn't the best way to use tvpad. If it was just used to surf the web it's fine but when you need bandwidth and P2P networking, it doesn't work very well.

## TVpad2 - Uses too much bandwidth!

[Post a reply](#)

3 posts • Page 1 of 1

### TVpad2 - Uses too much bandwidth!

by [Rofl](#) » Sat May 04, 2013 3:03 am

My parents purchased a tvpad2 a couple of months ago, and whenever they used it to stream live content, it absolutely crippled my 8Mbit network.

Now I've just upgraded to fibre broadband 38Meg, and although I have a larger proportion of the bandwidth reserved for my usage, I still experience intermittent slowdowns - particularly during gaming. I attribute the stutters to the upload speed being below par.

Is there anyway to limit the tvpad2's download/upload speed? If you have a higher broadband connection, will it automatically use the most bandwidth it can muster?!

**Re: TVpad2 - Uses too much bandwidth!**by **clubtvpad** » Sat May 04, 2013 11:32 am

TVpad is a bandwidth hog. The only way to limit it is configuring QOS on your router and set your own limit for up and down speed. However, not all routers have QOS settings.

I have 100Mbps up/down fibre connection, and I have no issues at all. So the answer to your question is NO, it will not use the most bandwidth it can get. It depends how many peers you have (see it like torrents). Actually the SopCast protocol used by TVPad is very similar to torrents, so the more peers you have the more upload bandwidth it uses. The only difference is that you can limit the upload speed with torrents, but not with SopCast.
